Dear Sir/Ma'am:

I am beyond excited to apply for the position of **Software Engineering Intern**. As someone who looks to make an immediate impact in the real world, especially in fields I use in my everyday life, I am thrilled at the opportunity to show my expertise and leadership skills as an Intern at Mark43.

Your listed requirements closely match my background and skills. A few I would like to highlight are:

- Highly skilled at designing and testing software
- Exhaustive knowledge of data structures and efficient algorithms
- Creative and innovative thought process

I have lived in the United States for the last 13 years and have completed my elementary, middle, and high school in the US and am now pursuing a double major at UC Berkeley. **As a dependent on my father's visa, I would require a work authorization visa of United Kingdom to pursue this wonderful internship opportunity.**

As can be seen on my resume, I am very passionate about and have been heavily involved in education, primarily through Computer Science Mentors at UC Berkeley and founding my own nonprofit mentoring organization, Mission EDU with a couple of friends. I sincerely look forward to translate all the skills I have obtained through academia, research, and personal projects to contribute to Mark43. Thank you for your time and consideration.

Best regards,

Viren Khandal
